

PG Email Newsletter Software

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

PG Newsletter Software is a PHP script that contains everything you need to start sending successful newsletters. Use built-in campaign editor to create visually stunning newsletters, promotional emails and flyers. Test your newsletter easily for spam words and the way it will be displayed in common email programs. Integrated templates can be used as a basis for creating newsletters. Create custom fields to capture additional details about people subscribing to your mailing lists. Fully personalize all areas of the email to optimize response. Use personalization tags to add subscribers details in the newsletter. Unlimited number of subscribers and mailing lists, subscription and unsubscription forms management, import and export options, bounce handling, extended statistics for each newsletter and subscribers activity and much more. Easy installation from your web browser, painless integration into any website. Free installation and life-time support.
