PhotoPost Classifieds - Classified Ads on your Website

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

From the developer of the well known PhotoPost PHP Pro gallery software comes PhotoPost Classifieds. Take your own piece of the classifieds market away from Craigslist, eBay, and local papers -- Connect buyers with sellers in your site's niche area of interest, or offer personals or job postings. With automated photo uploads and web based configuration, PhotoPost Classifieds is a no-hassle way to add a popular new dimension to your site. If you already have a forum (vBulletin, UBB Threads, phpBB2, or SMF Forum), PhotoPost Classifieds can use your existing user database for one centralized login, rather than making your users register twice, or use our built-in user registration system. Includes a feedback system styled after eBay's, a bidding system, PayPal payments, ad expiration, and optional zip code integration.
