Mobile Number	{value_mobile_number}
Email	{value_email}

Installed by over 14,500 websites, PhotoPost is unlike any other gallery software out there. It looks great, is packed full of features, is easy to install, and includes top notch support. For the past 6 years, PhotoPost has been the standard by which all other galleries are measured. PhotoPost lets you and your users upload photos or multimedia files to public or private albums, with discussions. Includes multi-language support and a full featured user registration system with usergroup editing to set user diskspace limits and album access privileges. Template based, and includes color/style themes. Although no forum is required, PhotoPost integrates with vBulletin 3.x and 2.x, phpBB 2.0, UBB Threads v6, Invision Power Board 2.0, and DCForums, to achieve one unified login and user registration system. With VB or UBB, you can display your recent photo uploads and your photo galleries on your main forum index page, and PhotoPost has an extensive vBulletin 3.x integratio
