PHP & AJAX Store Locator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This is a fully featured store locator that you can use to provide easy store locator functionality to your (or your client's) website in under 5 minutes. Features Easy to configure and set up. (minimal coding skills required) Uses Google Maps API v3 - No API key required! Highly commented, with extra documentation included. (with package) Admin Panel for listing, editing and removing stores. Front-End for adding stores. Easily integrated into existing website - minimal styling, login systems, etc. Uses jQuery library for effects and AJAX.
