PHP Application Server

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

PHP Application Server simplifies the development of Web applications and sites. It creates the environment of Web development in which the user will do not need special knowledge of designing and programming Web applications. You will be able create your own sites using a simple Web interface, premade modules, and applications (like Forum, YellowPages, News, etc.).
