

# PHP Calc

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

PHP Calc is the most basic calculator written in php. This is a 5 minute script that is powerful because you can make it calculate anything. It just takes some imagination and some knowledge of math. Feel free to change the script to make it like your site, but remember to leave credit if you change it.
