<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

First of all try to collect the necessary information which are important to display the actual month and highlight the actual day. Besides this we want to display the actual month and year informations as well. To do this we need 3 special days informations: 1. The actual day 2. The first day of the actual month 3. The last day of the actual month
