

# PHP Click Tracker

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This is a fully working script that'll let you create a list of links then record and display the number of clicks each one gets, though it's very basic but each section is explained and perhaps you can turn it into something useful.
