PHP Comment Script by StivaSoft

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A simple PHP comment script (guestbook script) which will help you integrate and easily manage a discussion board on your website. Your website visitors will be able to post feedback on your website or comment on different topics. Member activation and captcha protection prevent spam bots from posting. Also, you can allow comment reporting and have thumbs up/down rating on user comments. Our comment system has an easy administration area with different user level of access. Administrators can set main options and settings, customize the discussion board layout, add custom email and SMS notifications or translate the post comment script in any language. No programming knowledge is required to manage the comment script and customize the options. Follow a simple step-by-step install wizard to install the post comment script on your website. Webmasters can use the post comment script for work-projects and modify the software to fit their own or their clients needs.
