

# PHP Counter + mail notice

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

It's a PHP3 counter with a particularity: it can send you an email every X hits, easily configurable in the script. It can be a useful script to log your site via email, if you don't need a tracker or a free service with banner ads.
