PHP fortune cookie script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script uses the traditional Unix-fortune files to display quotes. The advantage of this is that there is already a huge amount of quote-collections available, so there is no need to write all the quotes in from scratch. Efforts have been made to make it as resource-cheap as possible to run the script. No database required.
