Mobile Number	{value_mobile_number}
Email	{value_email}

PHP iCalendar is a php-based iCal file parser. Its based on v2.0 of the IETF spec. It displays iCal files in a nice logical, clean manner with day, week, month, and year navigation, printer view, RSS-enabled, and searchable. It supports 15 languages, is fully theme-able, and has complete timezone support.
