

php Multi Syntax Highlighter

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

php Multi Syntax Highlighter v1.1.0 will "beautify" PHP, Pascal, Delphi and Applescript and others source code. It is not implemented like other beautifiers, as it does not use pcre function or ereg functions, and allows syntax code continually line by line to reduce memory usage. using css file for color and style, and compatible with XHTML.
