PHP Music Search is an advanced music search engine script that allows you to search many music resources on the web and find your favorite mp3 music files. This script is known for speed and simplicity. No database is needed. You just download, install and that's it! The script allows the user to search for song titles or artists, and displays results from various powerful music search engines all in one! The script is constantly updated with new music sources and features to keep users coming back for more. You can add this script to your existing site to increase traffic, or setup this script by itself in order to start earning ad revenue with programs like Adbrite, Kontera, Zango, etc. It's a win-win situation with PHPMusicSearch.
