

# PHP-Ping

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Update: Security Fix, \$count was not sanitized, now fixed! Enjoy. Update: Works now with 4.2+ (register\_globals change). Updated form validation (security). PHP-Ping is a PHP script to ping from your server. The author writes "I was looking for a easy ping script and didn't found one, so I wrote this one. Just one file, a single line to configure.". Update (Aug. 2002): no more errors with new PHP versions.
