

PHP Ping Script

| | |
|-----------------------|------------------------|
| Address | {value_address} |
| Contact Person | {value_contact_person} |
| Mobile Number | {value_mobile_number} |
| Email | {value_email} |

A code snippet that can be used to check if a server or website is up and running. Very useful if you need to ensure that a port or service or the server itself is still accessible online.
