

PHP Portal Builder

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

PHP Portal Builder was designed with high performance and scalable technology using PHP and MySQL. The key features, which distinguish it from similar portal solutions, are scalability and ability to generate HTML site content from databases with custom database fields (simple text boxes, text areas, files to upload, etc.)
