<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

PHP Processor is designed to help you protect your intellectual property when distributing PHP source files. The other use for PHP Processor is to optimize PHP source code and considerably decrease size of your source code files. PHP Processor provides a fast, intuitive way to obfuscate your PHP source code. Both variable and function names can be replaced with meaningless strings making your code difficult to read and alter for a third party.
