Read .PSD files (Adobe Photoshop Documents) using only PHP4 or PHP5 and GD. comes with imagecreatefrompsd(- function that returns an image handle just like the native PHP imagecreatefrom functions; The script supports documents from Adobe Photoshop 3.0 up to version CS3, where compatibility has been enabled. Class is also usefull for retrieving basic data from Photoshop document. You can use this script for a portfolio gallery or to see the contents of a .psd - file where Photoshop is not available... See <http://www.kingsquare.nl/phppsdreader> for a demo and the latest version.
