PHP RandomRotator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The simplest way to add banner ads to your website without the need for a database. PHP RandomRotator will also randomise anything you want including: - Plain text, Images, Banners, Quotes, and Links etc. You can place any number of banners, any size, anywhere on your website by using one simple line of code. In fact you could include whole html webpages, so visitors to your site will get a different page every time they visit! PHP RandomRotator uses a flat text file so no database is required.
