

PHP Rounded Corner Graphics Generator Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This PHP code sample uses GD library functions to generate rounded corner graphics. The script allows you to specify corner radius, corner color and background color and generates the graphics in GIF format. Use this script to dynamically generate rounded corners that blend nicely into your HTML/CSS design.
