

# PHP-SecureArea, Site subscription management

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Create a subscription membership area for a web site and allow authorized users after the purchase of a PayPal subscription. Users are automatically allocated to the membership area after payment has been confirmed from PayPal or manually added through the admin displays. PHP-SecureArea checks the transactions to prevent fraud and spoofing, administers the users and sends confirmation emails to the customers. When the user makes a valid purchase, they are able to log in to the secure area for the subscription period and continue to do so as long as the customer continues to pay the subscription. Access to the secure area will end when the customer cancels the subscription or when payment fails. Subscription installments are also supported allowing a fixed number of payments to be made for a defined period. Simple to install PHP/mysql system. The application can also be used with PayPal buy now buttons where there is no subscription created.
