

# PHP text counter

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

A counter is an essential part of a site to know how many people are coming to site. Here is an easy way to make a counter. All you need is access to PHP and be able to chmod a directory. We're going to save the amount of hits in a .dat file, so you don't even need a mySQL database. First off, you have create a directory and CHMOD it 777 so PHP can write the counter.dat file.
