

# PHP UK Postcode & Town Radius Search Script

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Postcode Search Script is the primary postcode search software which allows you to implement a fully featured radius search function using UK postcodes on your website. Postcode Search Script is designed to be flexible and can integrate with your existing website, whether it's a recruitment portal, real estate website or a dating website, Postcode Search Script is the right choice for you. Developed in PHP and using a MySQL backend, the Postcode Search Script is the perfect addition to any classified ads website.
