PHP Visitor Counter by MFScripts.com

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Our free php visitor counter allows you to see how many people are visiting your web pages. There is no need for a database, and the script is easily installed onto your website. You can also change the settings and styles easily with the configuration file. Instructions are given within the code, and in a README file to give you a better understanding of the script.
