php4flicks is a PHP/MySQL movie database. It features automatic retrieval of information from IMDB, genre support, user-defined movie categories, a completely CSS-based layout, a powerful search function, and the ability to export the movie list as a PDF. php4flicks is very configurable, easy to install and, last but not least, free! a multilingual version as well as a multi-user version with mysql-based user administration, buddy lists, loaned movies administration, a communication panel and much more are also available.
