This is a blog system for phpBB. It features an RSS feed, trackbacks, permalinks, support for BBCode and smileys, monthly archives (MySQL only), preliminary support for PostgreSQL and MS SQL, 7 optional stylesheets, integration with the phpBB Podcast mod, and GEO meta tags. Version 2.2.1 added a nice calendar. Version 2.3 added bugfixes, compatibility with phpBB 2.0.18+, and optional comment integration (so readers don't have to go into the forums to view comments).
