

phpBB2 Postnuke Module

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Love phpBB 2? Love postnuke?, why not have them both working for your website. Most of the code of phpBB 2 was left untouched, the database structure had no changes at all, so all popular mods should work with not too much effort. Please remember that the code is still considered in alpha state, works fine, but it is not recommended that you use it in production sites yet.
