

phpCMS-Plugin: csvImport

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

csvImport is a phpCMS plugin that can automatically import data in the csv-format from an external file. Features: templates for the data; configuration in the content-file; generate phpCMS-tags for each field; and easy installation. **1.0.2 update**: use alternative template every (configurable) number of lines.
