phpCodeGenie (PCG) is a code generator for database driven applications. PCG can generate entire working basic database driven applications for you. PCG can generate code from different databases. While the core version generates mostly PHP Code, phpCodeGenie can be modified to generate code in any programming language - Perl, Java, C#, ASP etc.. Just design your database tables and phpCodeGenie can write the php scripts and programs for you. phpCodeGenie will build data entry forms, insert scripts, database lister scripts, edit record forms, update record scripts, delete confirmation scripts, delete scripts, search forms, search scripts etc.. It provides a core basic code from which you can build on.
