

PHPCountMe

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Why not have a counter on your website so you can see how many visitors you are getting. PHPCountMe can be used as a text or image counter. With 10 different types of number displays, you will find one to suit your website. Extremely easy to configure with the usual step by step walk through installation. Try it out now and see the various counter styles you could have as your counter. You can even add your own digits very easily. Logs the hits to a flat file, so no database is required.
