Need a Store Locator for your website? Do your visitors need to find the nearest business location? Need a 'drop in' application that would work? Keep track of your Dealers with this quick and easy web based php application. Your visitors will be able to find the nearest store or dealer by searching by name, distance, city, and zipcode. Complete administration area included. This application features over 30,500 lines of php code, a template design, and CSS. You can also search by category/specialty, state, or country. We have also included hundreds of programming hooks to help make it easy to customize the application. NEW: Version 5.0.9 - Rewritten for PHP5.2 plus many enhancements and new features. Visit our site for an online demo. Updated Sept 26, 2011
