Phpion is PHP Encoding Solution developed by Phpion to serve those PHP developers, who need to protect their PHP / HTML code from tempering and unauthorized copying. Phpion converts the source code of PHP Script to compiled PHP bytecodes for accelerated runtime performance and maximum security. These bytecodes can be distributed to the end users of PHP Applications and run like regular PHP scripts. Files encoded by Phpion can run on PHP 4 and PHP 5 and are supported on every system. This Phpion PHP Encoder gives PHP Developers a peace of mind.
