Mobile Number	{value_mobile_number}
Email	{value_email}

A web framework to build and manage an unlimited number of websites. Looks very similar to Zope, PHPortal presents a very simple manner to exercise a highly sought after result; Highly portable, secure, re-usable programming to manage under one umbrella an unlimited number of websites. Writing to directories that are not left or preset as writable directories which allows for true "free hand" web-run software. 100% separation of code and design dynamic as well as static templates. Offers over 20 standard content-type formats that can be used to dynamically transform one content type to another. Built in with a XML-RPC server makes all PHPortal objects XML-RPC aware.
