Email	{value_email}

The phpPolls-extras Goodie Pack is an add-on to phpPolls supporting multi-question, multi-section surveys. Some of the extensions include: Edit existing poll questions, Cluster questions in sections, Ability to order questions within a section and to order sections within a survey, Sections maintain HTML-aware fields for section overviews and result-reporting resource/link annotations, Voting-booth walks through each question in the section, then to the next section until the survey is complete, Results reporting by section with Previous and Next section links dynamically generated for easy results navigation, Ability to 'freeze'/close voting on a section but allow its results to be reported along with other sections, and Optional use of phpLIB authentication for admin control panel.
