

# PHPSitemap

|                       |                        |
|-----------------------|------------------------|
| <b>Address</b>        | {value_address}        |
| <b>Contact Person</b> | {value_contact_person} |
| <b>Mobile Number</b>  | {value_mobile_number}  |
| <b>Email</b>          | {value_email}          |

PHPSitemap indexes HTML/PDF content, features multiple display options (ascending/descending by title/filename), and allows the user to change these variables on a per-directory basis using simple configuration files. Customizing the output is accomplished with plug-ins. Submit your own to the author for inclusion in future releases.
