Pink Notes Plus(tm) is personal instant messaging software that allows users on a PC network running Windows 95/98/NT/ 2000/Me/XP to send messages back and forth, either immediately or delayed, locally or over the Internet. No more lost business due to lost messages or unreadable paper messages... no more running around from desk to desk... no more message pads to buy, etc. Pink Notes Plus(tm) is also ideal for use as a reminder program, by sending yourself a delayed reminder message, just once, or on a repeat basis.
