Pivot is a tool to create weblogs (and to some extent other dynamic websites), written in PHP. Pivot is easy to setup, easier to maintain and even easier to work with. Features: Template based- Fully adaptable to your wishes; Language packs supported; Easy to upload and include pictures with your log-entries; comment system that remembers your visitors; Automagic Archiving by week or month; Uses style sheets extensively, so moderation will be much easier using a recent browser (IE5+ / Mozilla / Firebird / Safari 1+ / Opera 7+); Wysiwyg editor or plain editor; All data is stored using a solid flat files structure. No MySQL or other databases are required, just plain PHP..
