Email	{value_email}

If you're interested in setting up a photoblog this script might be for you. Heavily geared towards photobloggers, pixelpost comes with all the features that's been set as standard by the photoblogging community, keeping every level of photography skill in mind. The setup is a breeze and you'll get going in no-time. The look is completely customizable with a simple template system. It's very easy to switch templates and to create one (it's only html and css) and many are available for download with instructions on how to customize things to your liking.
