PluggedOut Blog is a PHP/MySQL solution for blogs, journals, diaries or any kind of calendar application. It has been developed by a professional software developer - meaning the code is easy to read, light and fast. If nothing else it serves as a good example for people starting out in programming of how to develop a thin client (web) application. Features... Multi-User with Roles, Themes & Templates, Monthly calendar with highlighted days and navigation controls, List of recent entries, Visitor comments, Verification codes on comments (anti-spam), Supports RSS 2, TimeZone control, BBCodes, Plugins/Includes supported, Full administration interface, Multi-Lingual Interfaces supported, Add, edit, remove and publish/unpublish blog entries, Change themes, Edit Template Files, File Uploads
