

# PodAdmin - Web-based Podcast Management

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

PodAdmin is a very simple web-based podcast management tool. Upload your new episode via web form, PodAdmin will then grab title and description from the ID3 tags and generate a new RSS feed on your website. Optionally you can specify the title and description if it is not embedded in your audio file. Then all you need to do is link to the generated RSS file. PodAdmin uses PHP and MySQL.
