Pointter PHP Content Management System Version 1.6 is an advanced, fast and user friendly CMS Software that can be used to build simple websites or professional websites with product categorization, product blogs, member login and AJAX live search modules. Beside the new Web 2.0 sleek design, the script has been validated as perfect by The World Wide Web Consortium (W3C)'s XHTML 1.0 and CSS Level 2.1 standards. The script provides the user to create unlimited static page boxes, static pages, main categories, sub categories and product pages. The system is very flexible and every box, category, static page and product page can be edited, moved, deleted and their page position can be changed. The script uses modular system and category box module, most viewed box module, newly added box module, member box module, today box module and AJAX live search module can be turned on/off and edited.
