<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

Instant visitor information...because results are stored in an online database and shown dynamically. And since it isn't cached, the results are shown instantly. \* Poll Pro allows your website visitors to vote on the current online poll. They can view the results of the current poll dynamically (including their own vote). Or, they can view the results of previously archived polls. (Serious or fun...it's up-to-you.) \* YOU (the site owner) get color graphs and data showing your visitors' opinions, anytime - from your browser-based administration (unlimited number of admins allowed). Admin can limit voting to once per visitor on a per poll basis, define questions, define response selections, and the colors associated with each response for the graphed results. \* Unencrypted ASP source code and guides included. Poll Pro is now free of charge, even for businesses. No catches, no adware, and no spam. Enjoy.
