Pollera is a simple poll system meant to be run via CGI allowing anyone to fill any of the polls you define. Features include: Keeps a log of IP address so one person/IP can vote only once, Stores the results in an easy to parse plain/text file, One installation can keep up and running as many polls as you want, Allows you to \*fully\* specify how you want the output pages to be generated for each poll, and Only administrator can close polls.
