

Pop-up image Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Turn regular images into depressible, pop-up buttons! This script creates the illusion of an elevated image by applying a shadow and shifting the image to the up and left. When the user holds down the mouse, the shadow is deleted, and the image shifted back to its usual position...just like a button!
