popupURL

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

popupURL is a variation of the goURL applet. Instead of using a drop down menu, it uses a popup menu. Both read the applet parameters exactly the same way, but popupURL uses an image in order for users to click on. The image must be placed in the same directory as the applet and must be named "image.gif".
