

# Port checker cgi script

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The port checker 1 cgi script will check ports on your computer to see if they are open, closed, or do they responding. This will give you a good indicator as to the status of your computers security status. The port checker cgi script can check unlimited number of ports. Ports can be easily added or removed in script just by opening it with notepad. Script checks ANY IP address you want, except reserved ones.
