PostgreSQL Backup n' Restore

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This class can be used to generate backups of PostgreSQL. It accesses a given database and generates SQL statements that can be used to recreate the database tables and the values stored on their rows. The generated SQL is stored in a given file. The class can also restore a database from a previously generated backup by executing the SQL statements stored in a backup file.
