Posts Table Pro is a new type of WordPress table plugin that generates dynamic tables of content already stored in the WordPress database. You can create instant tables for many purposes: - Index or table listing all your blog posts. - Website table of contents for improved navigation. - WordPress document library displaying your files or publications. - WordPress video gallery or audio library with embedded multimedia files. - Member directory listing experts or consultants. - Staff directory with employee details and phone numbers. PLUGIN FEATURES - Create WordPress tables listing posts, pages or custom post types such as products, portfolios, documents, publications or events. - Fully configurable - choose your column headers, whether to display the search box and filters, what happens when you click on an item in the table, and more. - Lazy load or AJAX option to boost performance on larger tables. - Add as many tables as you like to your website.
