

Posts Table with Search + Sort

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Posts Table with Search + Sort is a plugin to create instant WordPress tables listing your blog posts. While this free version is more limited than the Pro version, it has plenty of features. You can choose which columns appear in the table (name, date, author, description, categories, tags etc.), how many posts appear per page, and more. The plugin is ideal for creating an index of all your blog posts, especially if you have large numbers of posts. The table format with search box and sortable columns makes it easy for visitors to find the posts they're looking for. The table is fully responsive and looks great with any theme and on different screen sizes, mobiles and tablets.
